Have you tried WIRB's online "smart form" submission form? It can significantly reduce the number of questions you have to answer about your submission. Go to the "WIRBNet CLIENT LOGIN" section in the upper right corner of www.wirb.com to get started!

Investigator

Submission Form for Multi-Center Protocols

(Use ONLY for multi-center protocols already reviewed by WIRB.)

The following is a general list of items needed by WIRB to begin the review process for your research study. You will need to submit a submission form with each protocol you submit for review. **If the protocol you are submitting has NOT been previously reviewed by WIRB, you cannot use this form; you must use the full length Initial Review Submission Form (posted at www.wirb.com).** If you have questions, call 1-800-562-4789 or e-mail clientservices@wirb.com for assistance. WIRB is registered with OHRP/FDA; our IRB registration number is IRB00000533, parent organization number is IORG0000432.

INITIAL REVIEW REQUESTS must include one copy of the following:

- **Current version of WIRB initial review submission form.** You may utilize WIRB's online "smart form" feature to complete this form (Go to the "WIRBNet Client Login" section of www.wirb.com), or you may download a Word version or PDF from the Download Forms page to complete and forward to us.
- **Consent Form** under some circumstances (see question #2). Please submit consent forms as Microsoft Word compatible files.
- **Current professional license** for Principal Investigator, showing the expiration date*
- **Curriculum Vitae (CV)** for Principal Investigator and each Sub-Investigator*
- **Any site-specific materials to be provided to the subjects** that were not previously submitted by the sponsor or CRO. (Any commercially available validated instruments cited in the protocol that are used without modification are not listed individually on the Certificate of Approval; however, approval of the protocol does extend to the uses of such industry standard forms as described in the approved protocol.)

For DRUG or BIOLOGIC research, provide each of the following:

- **Qualified Investigator Undertaking Form** (Canadian sites)
- **For gene transfer studies subject to RAC review, please submit the RAC correspondence, Appendix M responses, and IBC approval and recommendations (if available).** If the IBC review has yet to occur, please provide a date for the intended review and contact information for your NIH-OBA registered IBC.

*Materials marked with an asterisk above may be omitted if WIRB is already in receipt of a current version.

Instructions for completing this form:

- WIRB does not accept handwritten versions of this form. You must submit a typed version to prevent errors and delays due to legibility problems.
- All questions must be answered. "N/A" is only an option where indicated.
- If the contact information provided in this form changes during the life of the study, please provide the updated information to us.
- The information provided in this submission form (addresses, phone numbers, contact names, payment information, etc.) will be used to produce your final regulatory documents and consent forms. Please note that your review may be delayed if we need to obtain clarification from you because information listed below differs from the information listed in the additional submitted documents.
- Please check the [WIRB web site](#) to ensure you are completing the most current version of this form – form is updated at least once per year.
- Use this form only for multi-center protocols already reviewed by WIRB.

Recruitment Bonus Disclosure Form (For Sites Answering Yes to Question 13)

Sponsor Name: _____ Sponsor Protocol No.: _____
Investigator Name: _____ Date: _____

WIRB defines a recruitment bonus as an additional payment or incentive provided to the PI or staff dependent solely on a particular number of subjects being enrolled, or dependent on the speed at which subjects are enrolled. The term "payment or incentive" includes any items of value, such as direct payment, gift certificates, travel vouchers, physical items such as watches, etc.

Recipient of the Recruitment Bonus:

Name: _____

Position of recipient of bonus:

- Investigator
- Sub-Investigator
- Other Research Staff
- Institution (e.g., Hospital, University, etc.)
- Other Party: _____

Description of Recruitment Bonus:

1. Who is providing the bonus? _____

2. Amount or form of recruitment bonus: \$ value: _____
(direct payment, gift certificates, travel vouchers, physical items such as watches, etc.)

3. Description of bonus, including conditions for payment of recruitment bonus:

(For example, PI receives \$XX for enrolling YY number of subjects within ZZ time period.)

Also, please attach any sponsor correspondence or materials describing the recruitment bonus program, or a copy of the budget for the research.

4. Please describe any additional costs that would be incurred by the site or the recipients of the bonus that would offset the value of the bonus:

(For example, the costs of additional advertising, costs of additional screening or testing, or staff time.)

WIRB Screening Requirements:

(If you plan to screen Canadian citizens, please call Client Services for more information about Canadian screening requirements.)

Introductory Statement:

- The script must include an introductory statement that informs the subject of the purpose of the questions and that they do not have to answer any questions they do not want to answer.
- The script must not describe the type of questions that will be asked as “confidential;” i.e., rather than saying “we would like to ask you some *confidential* questions,” say “we would like to ask you some questions.” It is acceptable to say “personal questions” or “sensitive questions.” The purpose of this policy is to prevent any possible misunderstanding that the answers will be held in complete confidence.
- When appropriate, the script must include an introductory statement warning the subjects of the sensitive nature of the questions that might make the subject uncomfortable, and preferably include an example (for instance, “We are going to ask you about drug or alcohol use.”) This will generally be limited to questions about mental illness, substance abuse, and sexual abuse. For these types of screening scripts, it is preferable to not collect any identifying information until after the questions are asked (i.e., collect the name and other identifying information at the end of the conversation and the form).

Here is a sample introductory statement:

[Thank you for calling] (or) [We are returning your call] about a research study we will be doing. The purpose of the study is [briefly describe study - e.g., “. . . to evaluate the safety and effectiveness of an investigational drug for arthritis”]. Participation in this study would last about [number of days, weeks, etc.] and (if applicable) would require up to [number] of visits to our office.

To see if you might qualify for this study, I need to ask you some questions about your health history and present condition. Some of these questions may be sensitive, such as questions about [give examples - e.g., drug use, birth control, mental health, sexual activity, etc.] You do not have to answer any questions you do not want to answer. You may stop this interview at any time. If you do not qualify for this study, the information you give me will be [e.g., “destroyed immediately” or “stored (where and for how long)”]. Do I have your permission to proceed? "

Body of Screening Form

- The Board expects to see the actual questions that will be asked, not just a general statement such as “inclusion/exclusion criteria addressed.”

Closing Statement

- The script must include a closing statement informing the subject of whether or not they have met the preliminary screening requirements.
- The script must address in a closing statement whether the information received from the subject will be destroyed immediately, or whether it will be stored, and if so for how long and where.
- If the site would like to keep information for future contact for new studies, this must be described to the subject as well, and the subject must have an opportunity to decline.

Additional Issues

- The screening script must be in language understandable by lay people. If complicated medical terms must be included in the screening script, please provide WIRB with an explanation of how they will be explained to the subjects.
- WIRB realizes that the script may not be followed verbatim, as subjects may ask additional questions or stray from the topic. This is acceptable, but WIRB expects that the interviewer will keep as closely as possible to the spirit and letter of the script.
- It is useful to WIRB if the investigator informs WIRB of the use of the recruitment screen; e.g., if it is going to be used with subjects calling in from advertisements, for calling patients listed in a database, or for conducting cold calls.
