GROUP ACTIVITY A

Which studies would be eligible for a waiver of informed consent process (P), waiver of consent documentation (D), or neither (N)?

___ A classroom receives a written survey to complete and return to the researcher.

___ Existing medical records will be analyzed for treatment outcome patterns.

___ An investigational drug will be administered for chronic renal disease.

___ A coded dataset will be obtained from a repository for analysis.

___ A survey link will be provided to participants for online completion in REDCap.
